

Psoriatic Arthritis

What it is

Psoriatic arthritis is a type of arthritis that can happen in people with psoriasis, a skin condition. It causes joint pain, swelling and stiffness. It can also affect the nails.

Common symptoms

- Painful, swollen joints, sometimes on one side only
- Swelling of a whole finger or toe ("sausage digit")
- Heel or tendon pain
- Nail pitting or separation
- Back stiffness

Self-care tips

- Keep up with your skin care plan. Tell us if your skin or nails change.
- Take your medicines exactly as prescribed. Do not stop them on your own.
- Keep all lab and follow-up visits.
- Stay active with gentle exercise, and rest during flares.

What to expect at GSMC

First visit: A rheumatologist reviews your symptoms, history and medicines, and examines your joints and skin.

Tests: Blood tests and imaging, as needed, help confirm the diagnosis.

Follow-up: Regular visits and lab checks help us adjust treatment over time.

When to call us

- A flare that does not settle with your usual plan
- Fever or signs of infection while on your medicines
- New symptoms, such as a rash, chest pain or leg swelling
- Side effects from your medicines

Call 911 for chest pain, trouble breathing, or signs of a stroke.
