

Sjögren's Disease

What it is

Sjögren's is a disease where the immune system attacks the glands that make tears and saliva. This causes dry eyes and dry mouth. It can also cause joint pain and tiredness.

Common symptoms

- Dry, gritty or burning eyes
- Dry mouth, trouble swallowing dry foods, dental cavities
- Joint pain and fatigue
- Swollen salivary glands
- Dry skin; numbness or tingling in some people

Self-care tips

- Sip water often. Use eye drops and sugar-free gum or lozenges as advised.
- Take your medicines exactly as prescribed. Do not stop them on your own.
- Keep all lab and follow-up visits.
- Stay active with gentle exercise, and rest during flares.

What to expect at GSMC

First visit: A rheumatologist reviews your symptoms, history and medicines, and examines your joints and skin.

Tests: Blood tests and imaging, as needed, help confirm the diagnosis.

Follow-up: Regular visits and lab checks help us adjust treatment over time.

When to call us

- A flare that does not settle with your usual plan
- Fever or signs of infection while on your medicines
- New symptoms, such as a rash, chest pain or leg swelling
- Side effects from your medicines

Call 911 for chest pain, trouble breathing, or signs of a stroke.

Call 732-202-3000
